TFA makes patient intake easy

What is patient intake?

Healthcare facilities use Revenue Cycle Management (RCM) or “patient intake” to track patient care from beginning to end for billing purposes.

TFA differentiator?

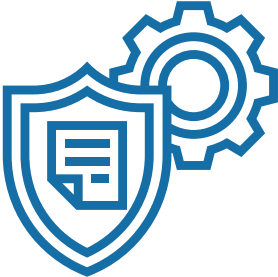

TFA makes business & accounting easy

Why use TFA for business & accounting needs?

At TFA, we create a **customizable approach and solutions** based on our customers' requirements to provide tailor-made results. The bottom line is that we streamline and automate our clients accounting functions, helping them **cut costs and boost profitability**.

What do we commit?

Current and compliant processes with the latest industry standards

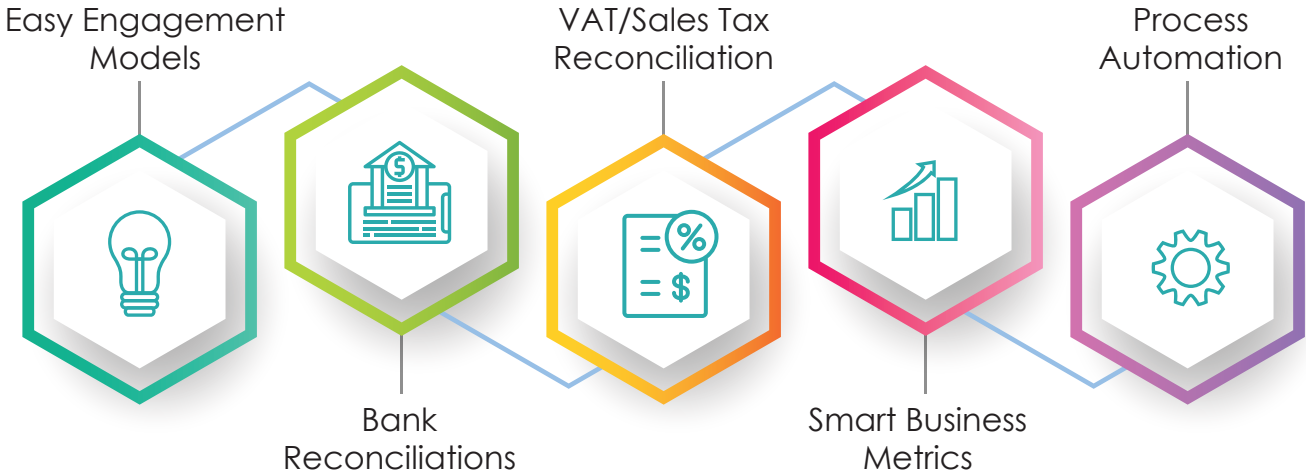

Secure data

Confidentiality

What do we offer?

Customizable business or accounting solution:
